## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Eggers et al (US Patent No. 5697882) or (US Patent No. 5871469) or (US Patent No. 5683366). The Eggers reference discloses an electrosurgical probe and method for treating a target tissue at a surgical site in figures 3 & 20 comprising a shaft and an electrode assembly disposed on the shaft, wherein the electrode assembly includes an electrically insulating electrode support and at least one active electrode terminal arranged on the electrode support, each of the at least one active electrode terminal having an electrode lumen therethrough, wherein the electrode lumen is adapted for removing unwanted materials from the surgical site, see col. 8 lines 8-53, col. 11 line 39 – col. 12 line 52, and col. 24 lines 8-31.

With respect to claims 2-14 & 17-19, for all 3 references see figures 3 & 20.

With respect to claims 15-16, see col. 11 line 39 – col. 12 line 52.

With respect to claim 20, see col. 3 line 47 – col. 4 line 47.

The applied reference has a common assignee with the instant application.

Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR 1.131.

Claims 1, 3-11, 17-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Stasz (US Patent No. 4936281). The Stasz reference discloses an electrosurgical probe and method for treating a target tissue at a surgical site in figure 2 comprising a shaft and an electrode assembly disposed on the shaft wherein the electrode assembly includes an electrically insulating electrode support 34 and at least one active electrode terminal 38 having a lumen therethrough and wherein the electrode lumen is adapted for removing unwanted materials from the surgical site, also see col. 3 line 17 – col. 4 line 15, and col. 6 lines 31-45.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Benjamin Huh whose telephone number is 571-272-8208. The examiner can normally be reached on M-F: 9:00 AM - 4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kevin Sirmons can be reached on 571-272-4965. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
